

Jon and Keith of Andover, were able to bring a respectable five fish bag to the scale on a day when the walleye just didn't want to bite. The first place team were able to fill their allowable creel by alternating jigging and trolling throughout the dismal day. With this determination they were able to weigh the most out of only seven teams that could reach the 5 fish limit. The team of Jackson and Jackson who finished second with a five fish limit, were heard saying that they only had 5 bites the entire day and were blessed enough to be able to land all of them. Out of the 32 boat field only 53 fish total were brought to scale weighing a total of just over 69 pounds.

Mosquito Lake April 19, 2008
